

The background features a dark blue and purple gradient with various business and technology icons such as a magnifying glass over a dollar sign, a bar chart, a lightbulb, a globe, and a person with a magnifying glass. A grid of binary code (0s and 1s) is visible on the right side. A blue arrow points right from the left edge, and a yellow arrow points left from the right edge, both passing through the main text area.

BROCHURE

THE EDI TO XML SERVICE

**FOR YOUR
BUSINESS NEEDS**

A brief guide into the popular EDI Service used by Small & Medium Enterprises to simplify & automate their B2B communication with Business Partners all over the world

A service provided by Namtek Consulting Services

400 Blvd Curé-Labelle, Suite 304, Laval, QC Canada - (450) 681-3009 - www.namtek.ca

About

The **EDI2XML Service** is the perfect solution for Small and Medium Enterprises looking to implement Electronic Data Interchange (EDI) into their business processes. Our team of EDI experts, along with our EDI2XML converter, get businesses EDI-compliant so that they can start exchanging important business documents with their Trading Partners. We also specialize in EDI integration within a company's management system, in order to streamline the entire EDI process and reduce human intervention.

We become your trusted and reliable EDI Partner!

The EDI2XML converter is a library of executable files developed to convert an ASCII X12 EDI file to XML format, based on a pre-defined schema (.xsd). This output XML file can be easily parsed and processed by most management software systems, since XML is today's standard for data exchange. For outgoing files, the converter works by reading an XML file and converting it into EDI format, as an output. Our converter can also handle file translations from or to EDIFACT formats as well as CSV (.csv) and Text (.txt) formats.

Due to various EDI requirements in today's ever-changing business world, our service provides the flexibility and scalability that every company needs and deserves.

EDI as a Service

EDI2XML as a Service is our popular "**fully managed EDI service**", including translation and communication service offering to businesses of all sizes, from various industries. All conversions of EDI files are done on our end, leaving customers with no on-site installation of software or hardware and an EDI project that is on time and within budget.

PROCESS FLOW

Our EDI2XML Team will be in charge of going through the EDI integration steps: starting from the planning of the EDI project, to the design of the customer's requested file format (XML, TXT, CSV), and to the testing and certification with the trading partner. No setup of any kind is done on our customer's premises.

Our team to communicate directly with your EDI partners. We drop off and pick up all EDI documents to and from your Trading Partners' server and send you email alerts when this is done.

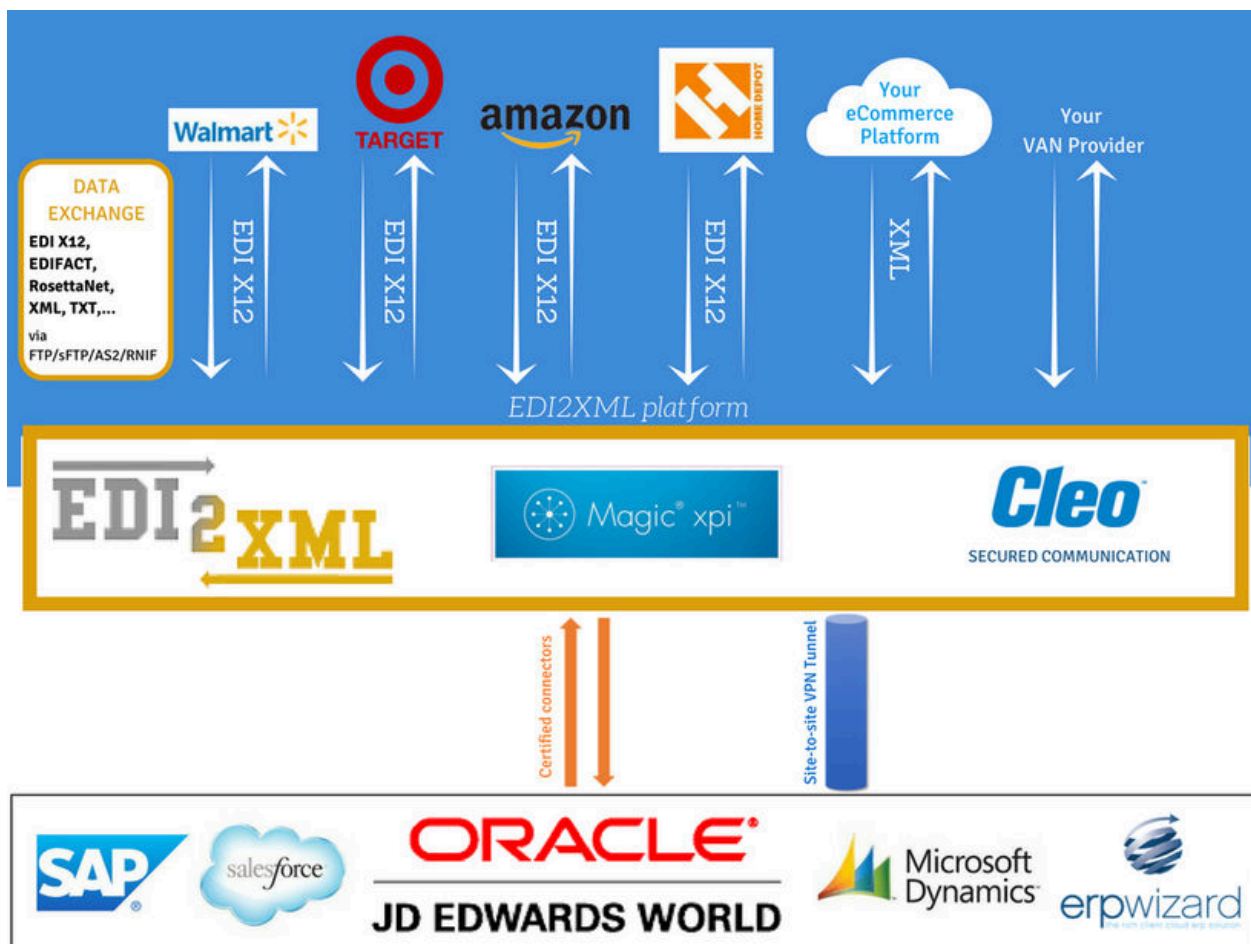

FEATURES

- ➔ Different dynamic monthly service packages
- ➔ Standard XML format for all incoming and outgoing EDI documents
- ➔ XML schema (.xsd)
- ➔ Any custom file format is available upon request
- ➔ EDI2XML is deployed on our private Cloud
- ➔ FTP site provided to exchange documents between our platform and yours

HOW IT WORKS

From A to Z, a customer's EDI requirements are handled by our team of EDI experts. We take care of:

- EDI mapping
- Trading Partner configuration
- Standards maintenance
- XML/CSV/TXT translation
- Send & receive EDI documents, to and from Trading Partners or to and from the customer
- Drop off & pick up XML/CSV/TXT files to and from the customer
- Integration with ERP application with certified connectors (if and when required option)

PRICING

The monthly EDI2XML Service & Mailbox fee is based on pre-packaged pricing packages per month, that grow (and shrink) dynamically based on the volume of data processed during a specific month.

EDI2XML web Service

EDI2XML Web Service, is an HTTP service running over the internet, on EDI2XML own platform that is capable of receiving HTTP requests to translate EDI messages to XML, and XML messages (based on EDI2XML's proprietary format) to EDI.

WHO IS IT FOR?

EDI2XML Web Service, is for developers and businesses, interested in building their own EDI (Electronic Data Interchange) integration flows and programs. Normally, these individuals, are capable of interacting with external API and Web Services to translate EDI to XML and XML to EDI, and have the resources and expertise to work with Web Services and HTTP requests in order to achieve their goals. EDI2XML web service, is the premier choice for IT people as a reliable service to accomplish such integration projects.

ADVANTAGES OF EDI2XML WEB SERVICE

There are great advantages for developers and IT project managers to use the EDI2XML HTTP service. Following, are some of the main advantages and benefits:

- ➔ No need for EDI experience: work with an XML format, that has been mastered by most developers, without the need for sharp expertise in EDI
- ➔ Quick Startup: Get started with less than an hour, from the time you subscribe and get your API tokens
- ➔ Easily integrate EDI into your flows: We provide a functioning Java client that you can use within your flows and projects, and starting getting results instantly
- ➔ Save time: We provide xml schema files of all the transactions EDI2XML supports.
- ➔ Outstanding technical support: Rely on our 20+ years of expertise in EDI and integration projects, whether for consulting, technical support, project planning: we have you covered all the way
- ➔ No contract: pay as you go and a very simple and dynamic pricing scheme

GETTING STARTED

Getting started with EDI2XML Web Service, is very simple and quick. Within less than an hour, you can issue the first Call to the Web Service and see the response. Our Web Service is very well documented and instructions are provided with each subscription.

HOW MUCH EDI2XML WEB SERVICE COSTS?

EDI2XML fees to consume HTTP / Web Service calls, are based on a very simple pricing scheme. There are [2] elements that make up the price:

- 1) Monthly mailbox fee: a “fixed” monthly fee for the Web Service Mailbox usage on EDI2XML platform. It is a none-refundable fee.
- 2) Data processing fee: a “variable” fee based on the volume of data processed and translated between EDI and XML, during a calendar month. The volume of data processed is computed in both directions:
 - a) Incoming, and
 - b) Outgoing

EDI Document Library

Below are the incoming and outgoing EDI documents that we have exchanged with several different Trading Partners. If you do not see a document in our library that your Trading Partner is requiring you to exchange, we can always add it. **Simply contact us for a free consultation.**

Your Trusted EDI Service Provider

“

"...Our biggest improvement is by far EDI2XML, which allows us all the flexibility and control to receive and send transactions flawlessly."

Jeff Khoury
Château Bodywear / Watson's

"I had the pleasure of recently working with Namtek Consulting Services. The company established our EDI platform with its EDI2XML Translation Service. Their team was very cooperative and knowledgeable. The information given to me enabled us to move fast and to make informed decisions. We worked in a collaborative manner with their team, who really understood our technical and commercial needs. I look forward to working with them again soon."

Nitsan Elmalam
Lamina Technologies SA
