

# EDI2XML WEB SERVICE

## HTTP REST API – VERSION 2.0

**Now with JSON Support, Auto 997 Response & OAuth2 Authentication!**

*Smarter. Faster. More Secure.*

Our upgraded **HTTP EDI Web Service** (REST API) is designed to provide fast, flexible, and secure EDI document exchange for your business applications. Whether you work with X12, XML, or JSON, our API handles conversions seamlessly in both directions.

## WHAT'S NEW IN VERSION 2.0

### NEW FEATURES & ENHANCEMENTS

#### Bi-directional Conversion:

- Send XML or JSON → Get X12 EDI
- Send X12 → Receive XML or JSON

#### Auto-generated 997 Acknowledgment:

- No extra call needed – 997 is returned automatically in the response payload

#### Flexible Format Support:

- Choose between application/xml or application/json in HTTP headers

### SECURITY UPGRADE

#### Improved Security with OAuth2

Your data is protected with industry-standard OAuth2 authorization:

- Use a **refresh token** to obtain a short-lived access token
- Access tokens are valid for 1 hour only – maximum safety
- Ideal for secure enterprise integrations
- Request and response payloads are Base64-encoded for safe transmission

## WHY CHOOSE EDI2XML WEB SERVICE?

*Simple, Reliable, Developer-Friendly*

- No contracts – Pay as you go
- Start in under an hour
- A trusted EDI partner since 2000
- Outstanding technical support
- Transparent and scalable pricing plan
